

Extreme hike!

17th mathematical hike is planned on **July 21st**. Every participant will contribute to determine the path by a dice roll on predetermined crossroads. Thus it will be (not entirely) random walk all day (possibility to leave anytime), approximately 50 km.

Meet at the tram stop "Řečkovice" at 6am (so we have enough time).

Have a great summer,

Jana Bartoňová or Jonatan Kolegar, organizers, Jan Slovák,

Director of the Department of Mathematics and Statistics
