

There are ongoing issues with student access, and this week we began to address this with the building administration.

If you know about students who are having trouble getting in, please send to [ltv@math.muni.cz](mailto:ltv@math.muni.cz) their ID number and when the problem with entry occurred so that it can be checked out specifically.

If someone follows you and cannot get in with a card, they must first press the \* button (green phone) and then enter the 4 digit number. The door is then unlocked by dialing 55 on the office phone during the call.

For seminars and exams, the door can be unlocked by referring to the [wiki](#) . After the action, please always return the lever to its original position so that the lock works again.
