

Analýza funkcionálních dat v praxi

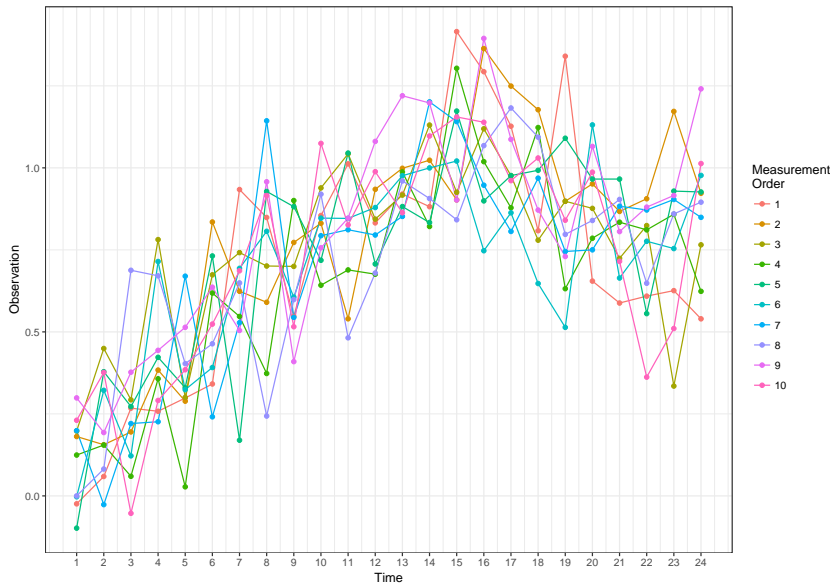

Jan Kolářček

Ústav matematiky a statistiky, Masarykova Univerzita, Brno

Brno 2018

❶ Analýza funkcionálních dat v praxi

Motivace

1 Nadaraya – Watson

$$W_i^{NW}(x, h) = \frac{K_h(x_i - x)}{\sum_{i=1}^n K_h(x_i - x)}$$

2 lokálně – lineární

$$W_i^{LL}(x, h) = \frac{\{\hat{s}_2(x, h) - \hat{s}_1(x, h)(x_i - x)\}K_h(x_i - x)}{n(\hat{s}_2(x, h)\hat{s}_0(x, h) - \hat{s}_1(x, h)^2)},$$

kde

$$\hat{s}_r(x, h) = \frac{1}{n} \sum_{i=1}^n (x_i - x)^r K_h(x_i - x)$$

3 Priestley – Chao

$$W_i^{PCH}(x, h) = \frac{1}{n} K_h(x_i - x)$$
