

List of posters

Nicoleta Aldea

Projective complex Finsler geometry

Tuya Bao

Circular trajectories for Sasakian magnetic fields on geodesic spheres in a non-flat complex space form

Adara Monica Blaga

Dual connections and statistical manifolds

Włodzimierz Borghiel

The gravitational field of the Schwarzschild spacetime

Aleksandra Fedorova

Degree of geodesic mobility of pseudo Riemannian manifolds

Arnab Gupta

Permanence criteria of replicator dynamics on a 2-sphere with boundary through vector optimization technique

Monika Havelková

A note on dynamics of singular Lagrangians

Jan Kurek

On the jets of vector bundle maps

Misa Ohashi

On generalized cylindrical helices and Lagrangian surfaces of R^4

Seddik Ouakkas

Conformal maps and warped product manifolds

Rui Martins Pacheco

Harmonic tori in rank one symmetric spaces

Radomír Paláček

The Zermelo problem in Riemannian manifolds

Konstantina Panagiotidou

Real hypersurfaces with ξ -parallel structure Jacobi operator in CP^2 and CH^2

Irina Peterburgsky

Motivational Aspects in Teaching Mathematics at Collegial Level. Examples from our Classroom

Aurea Quintino

Constrained Willmore Surfaces: Symmetries of a Moebius Invariant Integrable System

Pedro Antonio Solorzano

Sasaki Metrics and Holonomy. A metric geometric approach

Theoharis Theofanidis

Non-existence of real hypersurfaces equipped with recurrent structure Jacobi operator in nonflat complex space forms $M_n(c)$, $n \geq 2$

Jiří Tomáš

Bundles of covelocities and Weil bundle morphisms

Siraj Uddin

Warped product pseudo-slant submanifolds of nearly Kaehler manifolds

Rodica Cristina Voicu

Submersions and Curvature properties on remarkable manifolds

Joanna Marta Welyczko

Para-CR structures on almost paracontact metric manifold
