

Seminář z diferenciálních rovnic se koná v pondělí 2. 12. 2019 od 12 hodin v učebně M5.

Dr. Rotchana Chieochan (Khon Kaen University, Thajsko)

Floquet theory for q-difference equations

Abstrakt:

In this talk, we introduce q-periodic functions in quantum calculus and study the first-order linear q-difference vector equation for which its coefficient matrix function is q-periodic and regressive. Based on the new definition of periodic functions, we establish Floquet theory in quantum calculus.
