

The Department of Mathematics and Statistics together with Faculty of Mathematics and Physics of Charles University and the Union of Czech Mathematicians and Physicist organize the 5th International Workshop on Functional and Operatorial Statistics.

IWFOS 2021 will be held **from 23rd to 25th June 2021 online**, and during 3 days, the workshop will offer about 7 invited talks, 42 contributed talks and a poster session on theory, methods and applications in the vibrant field of functional data analysis from all over the world. The web page of the conference is <https://iwfos2021.sci.muni.cz/>

The purpose of the series of IWFOS is to highlight the major trends in different areas of functional statistics through the exchange of ideas and the promotion of collaboration between researchers from different countries. It aims at contributing to future developments of such areas. The workshop will be a platform for communication, exchange of ideas and interaction for researchers in statistics for infinite-dimensional and high-dimensional problems.
