

A list of electronic math magazines available at MU (more than 650 titles) can be found [HERE](#).

However, magazines from the EBSCO and ProQuest megadatabases are not included in this list.

But, it is possible to search for mathematical journals directly in these databases, for example:

EBSCO

<http://search.ebscohost.com> → EBSCOhost Research Databases → select Publications tab in the top bar → select databases (the most comprehensive is Academic Search Ultimate) → in the field Browsing Select By Subject & Description and enter a keyword in the field (eg Mathematics)

PROQUEST CENTRAL

<https://search.proquest.com> → select Publications in the upper bar → enter a keyword (eg Mathematics) in the search box and choose where we want to search (eg in subject) to Scholarly Journals
