

Innolec lectures dates: **4.4. - 5.4.2023, from 2pm to 4pm, 6.4.2023 from 10am to 11:30am and 1pm to 2:30pm, the lectures will be in the Seminar room on the 1st floor.**

Franc Forstnerič, University of Ljubljana

Title: Oka manifolds and applications

Abstract:

I will present some recent developments in the theory of Oka manifolds and their applications. After a brief review of the classical Oka-Grauert theory, I shall recall the notion of an Oka manifold and an Oka map, present the two main characterisations of this class of manifolds and maps, discuss the methods to find new Oka manifolds from known ones, and survey the examples. Time permitting, I shall discuss applications of Oka theory in the classical theory of minimal surfaces in Euclidean spaces.
